NC State Expert Can Discuss Fire at Apex Hazardous Waste Plant

North Carolina State University faculty can provide timely expertise on the explosion and fire at an Apex, N.C. hazardous waste plant that has caused the evacuation of approximately 17,000 people.

Dr. Viney Aneja, professor of air quality and environmental technology in the College of Physical and Mathematical Sciences, 919/515-7808, is an expert in environmental and air quality engineering. He can discuss emission, transformation, transport and fate of pollutants and pollutant monitoring and control. He also assists N.C. counties in air-quality modeling.
